IMPACT

In this challenge, more than 45 change makers from all over the world collaborated for 8 weeks to build the AI solution

The Project:

Consenz- Improve Driver Voice Assistance Using Machine Learning to Help Reduce Road Accidents

CERTIFICATE OF COMPLETION

THIS IS PRESENTED TO

Naresh Kaushal

| Lead ML Engineer

For collaborating in the Omdena AI challenge with impact startup Consenz. The accomplishments of this project includes defining the project pipeline, building models for filtering driver assistant voice when driver, assistant speak simultaneously, models for Music and Restaurant recommendation, driver mood with personality classification, and building a conversation agent that recognizes a wide range of intents and entities.
